ABOUT ME

I'm 24, and about 3 years I work as a web developer and just adore this profession.

I have experience working with heavy projects, and with the light ones. I use modern tools for web development, I often use frameworks, libraries, preprocessors, task managers, the console and "push" changes in Github. I know the principles of site building, BEM methodology, the principles of optimizing the speed of sites, the principles of semantic, clean and beautiful code, I like beautiful, fast and thoughtful interfaces, and I don't mind working on someone else's code. I'm not afraid of responsibility, I appreciate help, human kindness, I do my work seriously and always try to be better than "yesterday".

SKILLS

Languages of communication:

Ukrainian (native), Russian (fluently communicate and write), English (Upper-Intermediate level)
