ABOUT ME

I'm 25 and about 2+ years I work as a web developer and just adore this profession.

I have experience working with difficult projects, I use modern tools for web development, I often use frameworks, libraries, preprocessors, task managers, the console and "push" changes to Github. I know the principles of site building, BEM methodology, the principles of speed optimization, semantic, clean and clear code, I like beautiful, fast and thoughtful interfaces. I'm not afraid of responsibility, I do my work seriously and always try to be better than yesterday.

SKILLS

Languages of communication:

Ukrainian (native), Russian (fluent), English (Upper-Intermediate level)
